📁 PROJECTS

My Personal Portfolio Website, Tech Stack: HTML,CSS,Javascript ⬀

Its My Personal Static Website just to make sure I have a good practice in html,css and some javascript

Book Management System,Tech Stack: Asp.Net Core MVC,SQL SERVER 2019,HTML, CSS, JQUERY, BOOTSTRAP ⬀

This is a Book Management System where Admin can place all the latest collection of Books and Company as well as Customer can purchase the books via the Website. Stripe Payment, Facebook Login are included in this Application. Admin can easily process the order after the payment has been successfully done and also cancel the order after 3-4 days if the payment hasn't been done. After all the Successful Processing of Order, At Last the Admin can ship the Book. There is also some discounts in the book if he/she purchase more than 50/100 Books.

Cotiviti TeamBuilding,Tech Stack: Asp.Net Core MVC, Web API, SQL SERVER 2019,HTML,CSS,JQUERY,BOOTSTRAP

This is the companies project which were done in the trainee period from scratch. Here the employee from the company registers him/her in the team building to involve and recognize themselves in front of the team.
First of all, the users registers in the application and the admin list the event for the team building.

Expense Tracker,

Tech Stack: SyncfusionComponents, Html,CSS,Bootstrap,JS,Asp.net Core MVC,SQL Server

This is an Expense Tracker Prooject where we can track our daily expense and income. We can also view our recent transaction. Here the Category and Transactions models are created and by this we can show the Dashboard dynamically

Payment Details(Crud Operations), Tech Stack: Angular11,.NetCore Web API,SQL SERVER(FULL STACK PROJECT)

This is a Single Page Application(SPA) Project where users can easily insert data and can see their display records on the same page.Likewise, when Users want to update the records,they can simply click on the records and it populates on the same form where users inserts the records.Similary,Users can delete the records by just clicking on the delete icon

Chat Application, Tech Stack: .NET Core (MVC), Single R, HTML, CSS, JS,Bootstrap, MSSQL

Users can chat with another users and is currently on process. Messages and the user's details are stored in SQL Server. The UI design is similar to WhatsApp.

Order Management, Tech Stack: .Net Core MVC, HTML, CSS, JS, Bootstrap,MSSQL

Users can easily submit their order inquiry and place their order whereas admins can see their orders and can place the order as well. They can also easily process, ship and cancel the order at the same time.
