📁 PROJECTS

My Personal Portfolio Website ↗

Its My Personal Static Website just to make sure I have a good practice in html,css and some javascript

Order Management and Inquiry System, Tech Stack: C#, .Net, HTML, CSS, JS, Bootstrap

Users can easily submit their order inquiry and place their order whereas admins can see their orders and can place the order as well. They can also easily process, ship and cancel the order at the same time.

Chat Application, Tech Stack: .NET (MVC), Single R, HTML, CSS, BOOTSTRAP, JavaScript, MSSQL

Users can chat with another users and is currently on process. Messages and the user's details are stored in SQL Server. The UI design is similar to WhatsApp.

Object Detection System, Tech Stack: Flutter, TensorFlow using CNN ALGORITHM

Object can be easily detected with the given model accuracy. It is a mobile application and this system was designed using Flutter and CNN algorithm (TensorFlow)

CustomerDetails(Crud Operations),Tech Stack: .NET CORE (MVC), HTML, CSS, AJAX, XML, BOOTSTRAP, MSSQL

Users can easily insert data, update or edit data and delete the selected data using one click.

E-Commerce Website, Tech Stack: Flutter

This App is made similar to Esewa and the user can easily top up their balance, can view different product details and know about the App. This app is also Mobile Application and is made using Flutter.

Snake Game, Tech Stack: Flutter

This game or an app is made similar to the snake game of previously Nokia Mobile. As this app is Mobile App it is made using Flutter

Payment Details(Crud Operations), Tech Stack: Angular11,.NetCore Web API,SQL SERVER(FULL STACK PROJECT)

This is a Single Page Application(SPA) Project where users can easily insert data and can see their display records on the same page.Likewise, when Users want to update the records,they can simply click on the records and it populates on the same form where users inserts the records.Similary,Users can delete the records by just clicking on the delete icon
